

NATIONAL TYPE EVALUATION PROGRAM

Certificate of Conformance

for Weighing and Measuring Devices

For:

Point-of-Sale System
Software, Computer Interface, Scale Controller
Model: Ability Integrated Scale
Accuracy Class: III
Version: 1.0 or higher

***Submitted By: Contact Info. Updated November 2023**

Standard Features and Options

The capacity and division size and $n_{\max}$ depend on the parameters of the scale system.

For this certificate to be valid, this system must be interfaced with:

- Intuit, QuickBooks, Point of Sale, Version: 9 or Higher
- Microsoft Windows Based PC
- NTEP Approved Scale
- Cash Drawer
- Printer
- Keyboard, Mouse

Options:

- Member Discount Program
- Discount Unit Price
- Percentage Discount Unit Price
- Card-activated System

Temperature Range: -10 °C to 40 °C (14 °F to 104 °F)

This device was evaluated under the National Type Evaluation Program and was found to comply with the applicable technical requirements of "NIST Handbook 44: Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices." Evaluation results and device characteristics necessary for inspection and use in commerce are on the following pages.

Tim Tyson
Chairman, NCWM, Inc.

Randy Jennings
Chairman, National Type Evaluation Program Committee
Issued: May 18, 2011

Application: This is a Point of Sale system used in general purpose weighing for direct sale.

1135 M Street, Suite 110 / Lincoln, Nebraska 68508

The National Conference on Weights and Measures (NCWM) does not approve, recommend or endorse any proprietary product or material, either as a single item or as a class or group. Results shall not be used in advertising or sales promotion to indicate explicit or implicit endorsement of the product or material by the NCWM.

Point-of-Sale / Ability Integrated Scale

Identification: The certificate number is continuously displayed on the screen. By pressing the certificate number a drop box will drop down displaying all of the marking requirements.

Sealing: All adjustments affecting the metrological integrity of the system are made through the NTEP approved scale.

Operation: The system is configured with a training mode. When inspecting and testing, the inspector must have the store personnel place the POS into the training mode.

Test Conditions: The emphasis of the evaluation was on device design, operation, interaction with the scale, and receipt format. Several transactions were conducted to verify weight operations, price computations, tare capabilities, multiple pound/item pricing and member discount programs. POS software was interfaced with a CAS USA Bench Scale, NTEP CC-92-174.

Evaluated By: M. Kelley (OH)

Type Evaluation Criteria Used: NIST, Handbook 44: Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices, 2011. NCWM, Publication 14: Weighing Devices, 2011.

Conclusion: The results of the evaluation and information provided by the manufacturer indicate the device complies with applicable requirements.
