**2025 Specifications and Tolerances Committee**

Dear Committee Members,

Our business has long utilized a Walz Multiple Dimension Measuring Device In-Motion Volume System to determine the quantity of our product sold. Compared to our previous method, this system has proven to be significantly more effective.

We fully support the introduction of these devices into the marketplace, as well as the incorporation of requirements for their design, approval, and regulation into NIST Handbook 44.

Sincerely,

K. D. Manning

Chief Executive Officer
