REF: WATER PROFIT

April 19th, 2019

To whom it may concern

We installed the Waterprofit System in our property on 07/07/2018.

I would highly recommend this water saving device, since we have the valve installed in our property and we have recorded more than a 15% of savings on our water bills.

Our property uses a big volume of water monthly, and this valve helps us to save a lot of money.

Basically, the valve pays for itself in the first few months of installation.

It is a very easy installation.

If you have any questions, feel free to contact me anytime.
