Hello Richard,

We, at Walz Scale, are in agreement and full support of the proposed amendments/changes to Handbook 44 regarding volumetric measurement.

Best Regards,

WALZ

Subject: MDM on S&T Agenda

Hi All,

So far I have received positive input from only two members of the Volume Task Force. I was hoping to indicate strong support for our edits when I testify during the open hearing. I only have a few days left to write a formal statement for the S&T Committee, so I would appreciate additional input and comments. It make make a difference in moving the Items forward.

Sincerely,

Richard C. Suiter, Chair
MDMD Volume Task Force
