Subject: RE: MDM on S&T Agenda

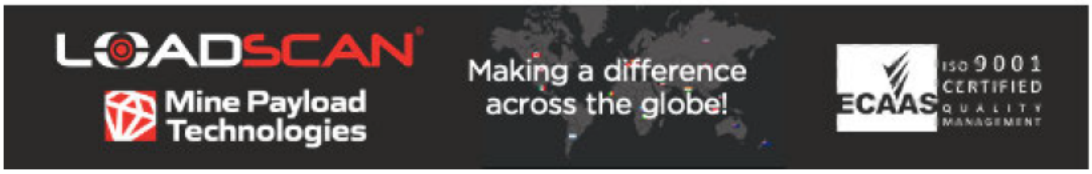

Hello Richard,

On behalf of Loadscan Ltd I would like to express full support for the latest version of the HB44 changes proposed in the latest version of the 'Response to OWM Analysis for 2025 NCWM Interim' document that has been distributed (including Loren Minnich's good edits and Barry Stone's corrections).

Sorry about the slow response. We are on Summer Holidays in New Zealand.

Regards,

Adrian Ruthe | Senior Software Engineer

Subject: MDM on S&T Agenda

Hi All,

So far I have received positive input from only two members of the Volume Task Force. I was hoping to indicate strong support for our edits when I testify during the open hearing. I only have a few days left to write a formal statement for the S&T Committee, so I would appreciate additional input and comments. It make make a difference in moving the Items forward.

Sincerely,

Richard C. Suiter, Chair

MDMD Volume Task Force
