Hello Richard,

Walz Scale is in full support of the changes and fully supports the groups efforts in the changes to NB44.

Kind Regards,

Matt Walz

Walz Scale

Dick,

I've amended some of the paragraphs with suggested language, including reorganizing the application section. I think it would be beneficial to make a clearer separation between devices that determine dimension or volume for freight charges, etc., and devices that measure the volume of a commodity. You're welcome to share with the MDMD Workgroup subgroup if you agree that this language is the correct direction to move towards.

I'll be available tomorrow until around 3 p.m. CST if you have questions. I'll be out of the office for the rest of the week.

Happy New Year.

Loren Minnich

Subject: Additional suggestions for change to Section 5.58. Multiple Dimension Measuring Devices

All,

The NIST Office of Weights and Measures (OWM) has provided an Analysis of all the Items on the Agenda of the NCWM S&T Committee for the 2025 NCWM Interim Meeting. Included are several questions,

suggestions, and comments for the MDM Items on the Agenda.

I am attaching their analysis and several additional suggestions to submit to the S&T Committee for changes to the MDMD Code in H44.

I am asking you to review the attached documents and provide feedback. If you have comments or questions or if you agree with the suggested additional changes, please respond to me with your thoughts or support for the additional items.

Further, if you think it is necessary, Jeff Gibson can probably arrange for a zoom meeting on January 2nd or 3rd, the time to be determined. Let me know if you want to do that and your availability.

Lastly, if possible, I would encourage you to attend the Interim Meeting to voice support for the items during the S&T Committee open hearing on Monday January 13,2025. If you are not able to attend in person, a letter from your company showing support would be a great alternative. Those letters should be sent to the S&T Committee Chair Mr. David Aguayo daguayo@co.slo.ca.us .

If you have questions feel free to contact me. I wish you and yours a Happy New Year.

Best Regards,

Richard C. Suiter, Chair
