CENTRAL

January 10, 2025

To: National Council on Weights and Measures
2025 Specifications and Tolerances Committee

Dear Committee Members,

Our company has been using a Walz Multiple Dimension Measuring Device In-Motion Volume System for some time and have found the system to be far superior to our previous method for the quantity of our (product) for retail sale. We fully support the recognition of the use of these devices in the market place and the addition of requirements to NIST Handbook 44 for specification and requirements for design, approval, and regulation of the systems.

Sincerely,

Henry Camasta
Central Civil Construction
